DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to independent claims 1 and 16, the prior art does not disclose nor suggest an apparatus or method for detecting a ferromagnetic object that comprises two sensors, one used to detect ferromagnetic objects through measuring an ambient magnetic field and a second sensor that detects the movement of objects in the vicinity of the first sensor along with a localized warning device to output at least one of an audible warning and visible warning. Akers (US Patent 3,573,817) discloses a similar system however Akers is directed to a covert monitoring system and would therefore teach away from a localized alarm system also Akers requires an operator to monitor the received signals from the two (or more) sensors and determine when an alarm condition exists based on those signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
